

Re: Docket# 98N-1038, "Irradiation in the Production, Processing, and Handling of Food."

I want the FDA to continue prominent labeling of food that has been treated with irradiation. The label should be conspicuous and include the logo for irradiation.

Your Signature:

Linda S Braumstein

Additional comments:

*The idea of not allowing the public to be informed of what ~~the~~ food has been how
there food has been processed is ridiculous + outrageous.
We have on the label whether foods are fried, baked etc
that is much less invasive on a cellular level than irradiation.*

98N-1038
